SAN FRANCISCO, May 19.-It is said that two deserters from the steamship Itata have given some interesting testi-mony in regard to that vessel before is investigating the Robert and Minnie case. These men, it is said, testified that when the Itata started north she had on board a number of rifles, four 5-pounders, and a crew of seamen and soldiers. Two days before the vessel steamed into San Diego all the munitions of war and the soldiers were stowed away in the forward hold and other changes were made which made her look like a first-class merchantman. The programme was for the Itata to get munitions of war from the Robert and Minnie, it being so understood by all on board, and everybody was on the outlook for the schooner. It is also the Itata to transfer her carro to the

coast of Lower California. Subpenas have been issued by Solieitor-General Taft, who is conducting the investigation on behalf of the government, for the superintendents of the Western Union and Postal telegraph companies. They will be expected to produce the telegrams that have been passed over their lines in the past month relating to Chilian affairs. The Peruvian consul in this city, Mr. Holloway, contends that the Itata had an ample supply of fuel when leaving San Diego to allow her to steam to Iquique without stopping, and he is of the opinion that the vessel has gone di-

rect to that point. The Esmeralda was to escort the Itata to Iquique. If the trip was made without interference, well and good; but if not, the Esmeralda, proposed to give battle. The Esmeralda and Itata were commanded from Iquique by each others' masters who exchanged to their rightful commands at San Lucas.
